PROFESSIONAL SUMMARY

HSE-focused professional with 4+ years of frontline experience in power plant operations and industrial safety within high-risk process environments in Saudi Arabia. Built a strong safety foundation as a Control Room Operator issuing and monitoring Permit to Work (PTW), Lockout-Tagout (LOTO), and isolation controls, then moved into a dedicated Safety Coordinator role during a major petrochemical turnaround. Skilled in risk assessment, job safety analysis (JSA), incident/near-miss reporting, and contractor safety oversight, with a record of zero lost-time incidents across continuous plant operations. IOSH Managing Safely and OSHA 30 certified, with NEBOSH IGC in progress, transitioning into a full-time HSE Officer/Coordinator role in oil & gas, petrochemicals, power, or mining.

KEY ACHIEVEMENTS

- Maintained zero major lost-time incidents over 3+ years of continuous plant operations at Ma'aden Gold's 63MW power plant.
- Issued and monitored 15–20+ Permit to Work (PTW) authorizations daily across hot work, confined space entry, electrical isolation, and LOTO activities.
- Secured Director-level approval at Ma'aden for a digital work request system, eliminating paper-based workflows and duplicate data entry.
- Recommended robotic solar panel cleaning for a 19,000-panel solar plant, improving energy yield and reducing manual cleaning exposure.
- Strengthened compliance with PTW, LOTO, confined space, and work-at-height controls across multi-discipline contractor and direct crews.
- Built Excel/Power BI dashboards to track safety observations, corrective actions, and incident trends for management visibility.

PROFESSIONAL EXPERIENCE

Scheduler – LDPE & HDPE Turnaround | *Tasnee, Saudi Arabia*

Nov 2025 – 2026

Dedicated HSE role supporting a major petrochemical shutdown/turnaround, responsible for daily field safety compliance and permit control across all disciplines..

- Supported the LDPE plant shutdown as Scheduler, monitoring progress against the approved shutdown schedule.
- Attended daily shutdown coordination meetings, presenting activity progress, delays, and schedule status to stakeholders.
- Coordinated with operations, maintenance, contractors, and other teams to align shutdown activities and resolve scheduling conflicts.
- Monitored planned vs. actual progress and identified activities requiring corrective action.
- Prepared and maintained shutdown progress reports for management review.

Safety-critical operations role on a 63MW power plant, combining process control responsibility with hands-on permit, isolation, and incident-reporting duties — the foundation of this HSE transition.

- Maintained safe and continuous operation of 6 Wärtsilä W20V32 TS engine units and associated utility systems.
- Issued and monitored Permit to Work (PTW) activities in strict compliance with site isolation procedures — averaging 15–20+ permits per day.
- Executed LOTO isolations for compressors, separators, and auxiliary systems prior to maintenance activities.
- Coordinated with field teams during abnormal operating conditions to prevent operational and personnel safety risks.
- Recorded and reported safety incidents, near misses, and operational deviations to management, supporting root-cause follow-up.
- Supported commissioning safety checks, ESD functional testing, and plant startup readiness activities.

CERTIFICATIONS & TRAINING

- IOSH Managing Safely — Completed
- OSHA 30-Hour General Industry — Completed
- NEBOSH International General Certificate (IGC) — In Progress
- Lean Six Sigma White Belt — Completed
- Site Training (Ma'aden Gold): Fire Safety, First Aid & Emergency Response, Permit to Work (PTW), Working at Height

TECHNICAL & SAFETY SKILLS

Safety Management	Risk assessment, Job Safety Analysis (JSA), PTW system, LOTO, confined space entry, emergency response, incident investigation & reporting
Safety Systems	Fire protection systems, gas detection systems, safety inspections, behavior-based safety observations (BBS)
Reporting & Data	Power BI, Advanced Excel, KPI dashboards, incident trend analysis, corrective action tracking
Plant Systems	Yokogawa Centum VP DCS, ProSafe-RS SIS, Siemens S7-1500 PLC, SCADA systems, STARDOM PLC, Foundation Fieldbus
Soft Skills	Toolbox talks, contractor safety monitoring, root cause analysis support, HSE documentation, cross-functional coordination

EDUCATION

Bachelor of Technology – Computer Science & Engineering

Dr. A. P. J. Abdul Kalam Technical University (AKTU)

LANGUAGES

English – Professional Proficiency | Arabic – Basic | Hindi / Urdu – Native
